

HK-PLSM08 PILING SIDE MOUNT LIFT TUBE HANGER KIT 4,000-8,000 LB

Open all bundles, bags, etc., and sort by size and quantity.

Mark all pilings so that all brackets are at the same level. Hold brackets in position and mark for the holes that are to be drilled thru the pilings. It is recommended that the hardware be 5/8" and go all the way thru the piling and be secured on the back side.

Mount the lift tube to the brackets with the included hardware. Place the rubber caps over the open ends of the tubes to keep out unwanted pests.

ITEM	PART #	DESCRIPTION	QTY	NOTE
